

New Products

Small Size Circular Connector CM09Y series

The conventional CM09 series can be mated easily and clearly with just one touch, and it has strong durability and a high-density insert arrangement (25 pins) with the contact and insulator covered with a metal shell.

The newly developed CM09Y series retains the features and number of contacts of the CM09 series mentioned above but is even smaller and lighter.

There are two types of connectors: panel-mounting type and cable-connection type, and the combination of contacts (male and female) can be selected according to customer needs.

We also have a lineup of cable-molding type with a bellows. This type has a smart product form and has the feature of protecting the cable from bending.

(Tadasu Takamatsu)

Connector appearance

Receptacle, Plug, Cable-molding type (Plug and Cable-connection)

Table.CM09Y series specification

Voltage rating (V)	30 DC
Current rating (A)	1
Wire size	AWG 24~28
Wiring method	Crimp
Number of contacts	25
Water-proof	IP67(At mating)
Operating temperature (°C)	-25~70
