Fujikura R&D Center Thailand

In April 2008, Fujikura R&D Center Thailand (FRDT) was established as Fujikura's new R&D site at Thailand Science Park (TSP) in the suburbs of Bangkok city in Thailand, and the R&D business started in August.

The aims of FRDT are improving R&D and technical abilities of Fujikura group of companies and factories in Thailand, grooming Thai engineers, supporting Japanese domestic R&D site and so on. Currently, dye-sensitized solar cell is being developed at FRDT in cooperation with Japanese domestic Material Technology Laboratory.

From now on, FRDT will continue to develop and will work in cooperation with laboratories and universities in Thailand and Fujikura's Japanese domestic R&D sites, mainly focusing on electronic material products that Fujikura group of companies produce in large quantities in Thailand. The company wants to delight people all over the world.
